SUBJECT: Negotiations for the Transfer of the GPO State Service
Printing Facilities to the Agency for Operation in the
New Headquarters Building

b. The transfer to CIA of all other equipment in the State Service plant which will be needed in the new Agency plant at prices to be negotiated but not to exceed a total of \$225,000.00. A list of this equipment is attached.

c. The transfer of GPO personnel employed at the State Service plant to the Agency at such time as the operation begins in the new headquarters building. (This involves approximately 124 personnel working two shifts and will require a corresponding increase of the personnel ceiling of the Office of Logistics).

d. Satisfactory schedules for the transfer of equipment and personnel.

5. After satisfactory completion of the above negotiations, it will be necessary to obtain numerous other approvals. These include the Joint Committee on Printing, the Bureau of the Budget, and possibly the General Accounting Office. It is also possible that discussions will be necessary with a number of the State Service plant's customer Agencies including Atomic Energy Commission and the Department of State.

6. It is recommended that authority be granted the undersigned to conduct the above-mentioned negotiations.

JAMES A. GARRISON
Director of Logistics

MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Negotiations for the Transfer of the GPO State Service
Printing Facilities to the Agency for operation in the
New Headquarters Building

1. This memorandum contains a recommendation for approval. Such recommendation is contained in paragraph six.

2. The question of the disposition of the GPO State Service printing plant located in the basement of the Administration Building has been under consideration for some time. This facility exists primarily for the purpose of printing the MIS publications and ORR map work. Approximately 90 percent of the production of the plant is Agency work. Due to the distance involved, the possibility that the building in which this plant is located will eventually be demolished, and the inadvisability of hauling classified printing the considerable distance to the new headquarters building, it is planned to merge this facility with the Agency's facilities in the new headquarters building. This will permit the printing facility in the new headquarters building to perform all of the Agency's classified printing.

3. Numerous steps have been taken looking toward this consolidation of printing facilities. These steps include (a) development of plans for the printing plant in the new building which include the space and equipment required to do the printing now done by the GPO State Service plant; (b) preparation of equipment replacement schedules which will permit the procurement of necessary new and replacement equipment over a period of three years; and (c) discussions have been held with the staff of the Joint Committee on Printing to obtain their informal approval of the merger and their advice and guidance on the method of proceeding with these negotiations.

4. The next step seems logically to be to begin negotiations with the Public Printer. These negotiations are for the purpose of obtaining the Public Printer's complete approval of the acquisition of the State Service printing plant by the Central Intelligence Agency. Specifically it is planned to negotiate the following:

a. The transfer free of cost to CIA of all equipment originally purchased by CIA or its predecessor agencies and now in the GPO State Service plant. A list of this equipment is attached.

UNITED STATES GOVERNMENT PRINTING OFFICE
WASHINGTON 25, D. C.

OFFICE OF
THE PUBLIC PRINTER

July 9, 1956

Mr. Allen W. Dulles, Director
Central Intelligence Agency
Washington 25, D. C.

Dear Mr. Dulles:

Thank you for your letter of July 4 concerning the construction of a new headquarters building for the Central Intelligence Agency and the consolidation of all printing and reproduction facilities which are now serving the agency with classified printing.

We shall be very glad to enter into discussions in order to develop a plan which can be implemented at the appropriate time in the future. I have designated Mr. Harry D. Merold, Production Manager, to represent me in this matter. Mr. Merold is currently on leave through July 16, but he will contact Colonel White, your representative, shortly after his return.

I appreciate very much the friendly tone of your letter, and I am sure that we shall be able to work this matter out to the entire satisfaction of the Central Intelligence Agency.

Very truly yours,

Handwritten signature of Raymond Blattenberger
RAYMOND BLATTENBERGER
Public Printer

C O P Y

4 July 1956

Honorable Raymond W. Blattenberger
The Public Printer
Washington 25, D. C.

Dear Mr. Blattenberger:

As you probably know, the Central Intelligence Agency has been authorized to construct a new headquarters building and our plans are proceeding for this facility to be located on the Bureau of Public Roads Research property in the vicinity of Langley, Virginia. In line with our over-all objective to consolidate all of our headquarters personnel and activities in one building, we anticipate consolidating all of the printing and reproduction facilities which now service the Agency with classified printing. While it will probably be about three years before we actually move to our headquarters, the architect is now in the process of drawing detailed plans and specifications. Plans for our classified printing facility must, therefore, be completed in the very near future.

Inasmuch as the GPO-State Service Printing Plant located in the basement of this Agency's Administration Building at 2430 "E" Street, N. W., is now doing a substantial part of our classified printing, I believe that it would be mutually advantageous for our representatives to meet at an early date to discuss this matter and to work out a plan which can be implemented at the appropriate time with a minimum of inconvenience to both agencies. If this is agreeable to you, Colonel L. K. White, one of my Deputy Directors, will be glad to represent me in this matter. Colonel White may be reached by telephone on Code 143, extension 717.

Sincerely,

/s/

Allen W. Dulles

Subject: Attached Letter to Public Printer re Transfer of GPO -
State Service Printing Plant to the Agency

2. Reference in paragraph f of the attached letter to no objection by the Department of State and the Atomic Energy Commission to the transfer is based upon verbal discussions with appropriate representatives of these agencies. Letters requesting formal concurrence have been written but replies thereto have not as yet been received.

3. Reference (c) estimated the cost of equipment to be purchased by the Agency at [redacted] and DD/S authorization was given to negotiate the transfer at a cost to the Agency up to this figure. Actual agreed upon reimbursement price for this equipment is [redacted] and is set forth in Annex C to the attached letter.

25X1

25X1

4. Concurrence of the Bureau of the Budget to this transfer has not been obtained by this Office. It is felt that if such concurrence is required the Office of the Comptroller should obtain it through the regular contacts established with the Bureau of the Budget. So far as is known, no other concurrences are required.

5. This Office is prepared to assist the Comptroller in working out details of the transfer of funds for the operation of this plant under Agency control and to help develop the financial accounting procedures which will be necessary in connection with this plant.

JAMES A. GARRISON
Director of Logistics

MEMORANDUM FOR: General Counsel
Comptroller
Deputy Director (Support)

OCT 1 1956

SUBJECT: Attached Letter to Public Printer re Transfer
of GPO - State Service Printing Plant to the
Agency

- REFERENCES:
- (a) Copy of Letter from the Director to the Public Printer dated 4 July 1956 re transfer of GPO - State Service Printing Plant to the Agency.
 - (b) Copy of Letter to the Director from the Public Printer dated 9 July 1956 replying to the Director's letter of 4 July 1956.
 - (c) Copy of Memorandum to Deputy Director (Support) from Director of Logistics dated 8 May 1956, subject: Negotiations for the Transfer of the GPO - State Service Printing Facilities to the Agency for Operating in the New Headquarters Building.

1. The attached letter to the Public Printer proposing the transfer of the GPO - State Service Printing Plant to the Agency is submitted for formal concurrence prior to submission to the Director for signature. This Office has completely staffed out the letter with the Government Printing Office and the staff of the Joint Committee on Printing, and has discussed the transfer with representatives of the Department of State and the Atomic Energy Commission. The procedure agreed to by the parties to the agreement is to have the Director request the transfer of this GPO plant to the Agency by the attached letter; the Public Printer to concur in the transfer by return letter; and the proposal then to be submitted to the Joint Committee on Printing for approval. After approval by the Joint Committee on Printing actual arrangements will be made for the transfer of equipment, supplies, and personnel by the effective date of January 1, 1957.

MEMORANDUM FOR: Acting Deputy Director (Support)

SUBJECT: Attached Letter to Public Printer re Transfer
of GPO - State Service Printing Plant to
the Agency

1. The attached file recommends that the Director sign a letter to the Public Printer requesting the transfer of the GPO Printing Plant located in the basement of the Administration Building from the GPO to CIA, effective 1 January 1957. According to Attachment 4 (para. 4c), this transfer would require an increase of 124 in the personnel ceiling in the Office of Logistics. In view of the Director's decision, the ceiling programmed for during the current Fiscal Year 1957, as developed during the review of the Operating Budget for that year, would not exceed the amount originally included in the Congressional Budget for Fiscal Year 1957. In addition, the DCI directed the budgeting for a reduction in personnel strength in Fiscal Year 1958 of 100. In view of these facts, it is believed that the policy question as to whether an increase in Agency ceiling will be authorized in order to absorb this transfer or whether the ceiling required to provide for the employees received on transfer would have to be provided by reduction elsewhere in the Agency be made before definitive action is taken on the attached proposal.

2. The only budgetary problems are those (a) involving ceiling concerned in the attached proposal, and (b) the financing of the purchase of equipment in the amount of [redacted] Since the Agency is already paying for the services of the Printing Plant through reimbursements to the GPO, the funds budgeted for such reimbursements can be used to pay the direct charges of operating the Plant. It is anticipated that the financing of the purchase of equipment can be worked out during the course of the year through savings in budgeted operations.

25X1

3. Since the attached proposal involves a transfer of functions between Government agencies, it will be necessary to obtain concurrence of the Bureau of the Budget prior to the accomplishment of the proposed transfer. Before taking the matter up with the Bureau of the Budget, however, it is necessary that a determination be made on the personnel ceilings in order to evaluate the impact of the change on the Agency's budget.

SECRET

SECRET

4. It is therefore requested that the following two issues be resolved policy-wise within the Agency, prior to returning the file to the Comptroller's Office for coordination with the Bureau of the Budget:

a. Does the Director wish to accept the recommendation on the transfer as proposed.

b. If the proposed transfer is approved on a policy basis, will an increase in the personnel ceilings be approved in order to provide the personnel strength to carry out the operation, or will it be necessary to reduce other activities in the Agency to offset the personnel increases required by such a transfer.

Acting Comptroller

Honorable Raymond Blattenberger, GPO, Washington 25, D. C.

Office shall be transferred to the Central Intelligence Agency without reimbursement therefor. A list of such equipment has been jointly prepared and is attached hereto as Annex B.

d. All other printing equipment now in the plant which has been procured by the Government Printing Office shall be transferred to the Central Intelligence Agency and the Central Intelligence Agency shall reimburse the Government Printing Office in the amount representing the cost to the Government Printing Office less depreciation to January 1, 1957. A list of such equipment showing the reimbursement price of each piece of equipment has been jointly prepared and is attached hereto as Annex C.

e. All supplies, replacement parts, etc. (except those furnished by the Central Intelligence Agency), which the plant may have on hand or on order as of the effective date of the transfer shall be acquired by the Central Intelligence Agency at a price representing cost to the Government Printing Office.

f. The Central Intelligence Agency shall provide classified printing at cost to the Atomic Energy Commission, the State Department, and any other agency which heretofore has used the subject plant for classified printing to the extent that such service may have been previously furnished by the Government Printing Office. The Atomic Energy Commission and the State Department have been apprised of this proposed transfer and have interposed no objection thereto. The subject printing plant shall not perform any unclassified printing for the Central Intelligence Agency or for any other Government Agency, except upon waiver issued by the Government Printing Office, while operating in its present location. When the plant is merged with the Central Intelligence Agency's facilities in a single location no unclassified printing shall be performed by this printing plant except that type of printing which would normally be produced in a Government duplicating plant.

Honorable Raymond Klattenberger, GPO, Washington 25, D. C.

g. The Central Intelligence Agency shall offer to those Government Printing Office employees presently employed in the plant the opportunity of transferring to and becoming employees of the Central Intelligence Agency.

h. The Government Printing Office shall retain on its rolls as its employees those personnel electing not to transfer to the Central Intelligence Agency, except that personnel on the rolls of the plant when administrative control was assumed by the Government Printing Office on February 1, 1949, or recruited subsequent to that date for specific assignment to the plant, shall not be accorded the option of remaining on the rolls of the Government Printing Office. Prior to the effective date of this transfer the Government Printing Office and the Central Intelligence Agency shall jointly prepare a list of personnel desiring to transfer to the Central Intelligence Agency.

i. The Central Intelligence Agency shall be responsible for obtaining personnel to replace those Government Printing Office employees who may elect not to transfer to and become employees of the Central Intelligence Agency. However, the Government Printing Office will, on requisition by the Central Intelligence Agency, detail for a period not to exceed six months and at their prevailing salary, such personnel as may be required until replacement personnel can be recruited, cleared, and entered on duty.

j. Upon the effective date of this transfer the Central Intelligence Agency shall have exclusive operating control of the printing plant.

k. The Central Intelligence Agency shall be responsible for obtaining agreement with the Atomic Energy Commission regarding clearance of Central Intelligence Agency personnel assigned to do the Atomic Energy Commission's classified printing referred to in paragraph f. above.

The Central Intelligence Agency is anxious to assure the transfer of this printing function with the least possible inconvenience to all concerned. To this end, I assure you that

Honorable Raymond Blattenberger, GPO, Washington 25, D. C.

we will cooperate with the customer agencies and the Government Printing Office to the fullest extent. This facility will therefore be available to the Government Printing Office for printing highly classified work for which your main plant may not be equipped. Further, this Agency intends to continue to rely on the Government Printing Office for its unclassified printing and for paper and supplies used in our printing facilities.

Sincerely,

SIGNED

Allen W. Dulles
Director
